## Angle Relationships

The angles below marked by the stars are related to each other somehow. Remember, **alternate** means “opposite side of the line”; **conjugate** means “joined” or “married”; **corresponding** means “agreeing with”; **interior** means “between the lines”; and **exterior** means “outside the lines.”

For each diagram below, choose from one of the following angle relationship names, then write your choice next to it:

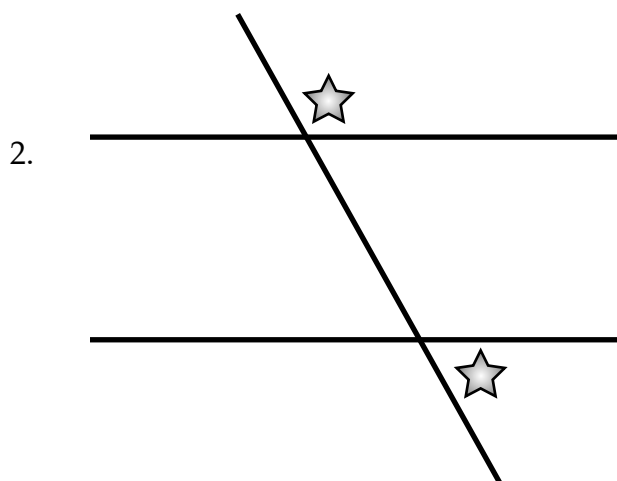

- alternate interior angles
- alternate exterior angles
- conjugate interior angles
- conjugate exterior angles
- corresponding angles.
